Uterine Fibroid Study Questionnaire Follow-Up 2001

Thank you for agreeing to take part in this follow-up study. First, I'd like to check the information we already have. Is the name we used on your letter still your current name?

[IF NO, RECORD CURRENT NAME ON CONTACT RECORD AND CONTINUE]

[IF YES, CONTINUE]

[IF NO: VERIFY DOB ON CONTACT RECORD. IF DIFFERENT, ASK DOB AND RECORD.] *I'm sorry, I may have contacted the wrong person. I will check our records and give you a call back. Thank you for your time.*

[IF YES:] *In this interview, we'll be discussing a number of topics including your medical history, pregnancies, menstrual history, family planning, and smoking habits, especially since your last interview with us in [INT MO/YR] when you were [AGE AT INT] years old. If you have had surgery or other procedures to treat problems with the uterus, we will be asking you to complete a separate medical release form that we will mail to you. With your written permission we will be able to obtain a copy of the surgical or other procedure report. We understand that some things we ask may be difficult to remember. The dates we will be asking for in many of the questions are really important to help us compare changes in health over the years of the study. So please take the time you need to check your records or give us your best estimate of any dates or ages that we will ask about. Thank you for your patience with this.*

I want to remind you before we begin that your participation is completely voluntary and all the information collected will be kept private and confidential, to the extent permitted by law. Your name does not go on this questionnaire, only an ID number. If for any reason you would rather not answer a question, we can go on to the next. Also, you may choose not to participate in this study at any time.

Finally, for your information, my supervisor may be monitoring or listening in on some parts of the interview to make sure that I am conducting the interview according to instructions.

Do you have any questions before we begin? **[IF YES, ANSWER QUESTIONS AND THEN CONTINUE WITH SCRIPT]**

We will ask about particular prescription medications you might be taking. If you are taking any prescription medicines, could you please get the bottles now so you can refer to them when I get to those questions? Also, if you have any records of your menstrual periods and the six year calendar we sent you, could you get those also?
